

# **BROKEN VIEW EDITING ISSUE**

( Date: 02 April 2015 )

## CASE I

## CASE II

1. In CASE I we can edit broken view easily.
2. In CASE II we could not edit broken view. For editing broken view in of CASE II first we have to delete section view and after that we can edit broken view. So how to update broken view by avoiding with out deleting section view.

Thank You
