

HCi Series

Touch Panel Operator Interface

Specification

Overview

HCi series is the operator interface to allow operator to access all controller functions through custom graphics and touch screen interface on color LCD display.

HCi 04 – M/T

M : 3.8", Mono LCD (BLUE)

T : 3.8", TFT LCD (256 colors)

Touch Screen (Analog/Resistive Type)

HCi 05 – S/T

S : 5.7", STN LCD (256 colors)

T : 5.7", TFT LCD (256 colors)

Touch Screen (Analog/Resistive Type)

HCi 08 – T

8.4", TFT LCD (256 colors)

Touch Screen (Analog/Resistive Type)

HCi 10 – T

10.4", TFT LCD (256 colors)

Touch Screen (Analog/Resistive Type)

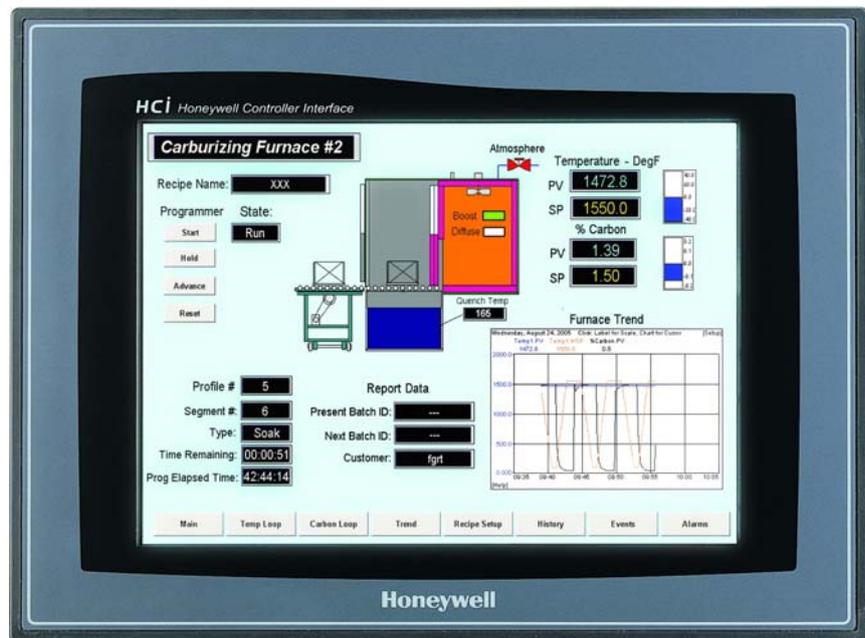

Features

- **Color TFT LCD (HCi 04/05/08/10)**

Color TFT LCD is standard on all HCi models. It is a high quality display with wide viewing angle. It provides up to 256 real colors.

- **Touch Screen (Resistive Type)**

Operator can effect changes to parameters by touching the screen directly. It offers much easier operation than the conventional keyboard.

- **Processor - 32 bit RISC CPU**

The HCi uses a 32 bit RISC CPU for high speed graphic processing

- **IP65F Front Enclosure**

Front face is IP65F rated to permit use in tough applications where the HCi is subjected to moisture, dust etc.

- **Communication**

RS-232C and RS-422 serial ports are standard features. Custom interface designs can be downloaded via RS-232C communication.

- **Multi-Language Support**

Language selection can be made on screen. Choices include English/Korean or English/Chinese

- **HCi Designer**

HCi Designer software is offered as standard package. Custom designed graphics can be variables, and those variables can be selected without register addressing.

- **Various Objects (Tags)**

HCi designer offers the flexibility of such tools as numeral, lamp, message, alarm, keypad, graph, animation, window etc. It makes the design of monitoring and operating displays a breeze.

- **Function Keys (HCi 04 only)**

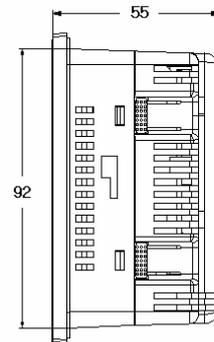

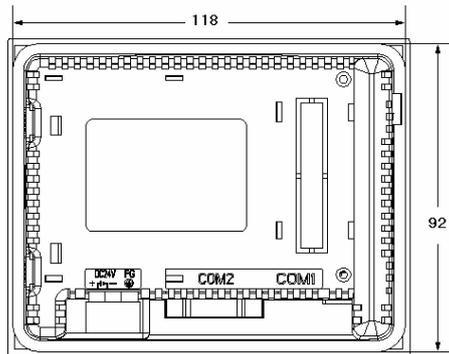

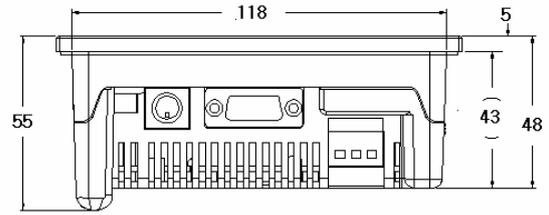

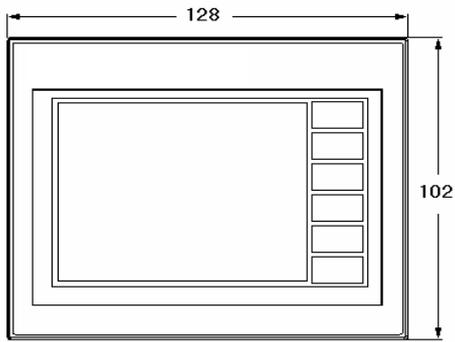

Function keys from F1 to F6 are available and can be used for increasing and decreasing numbers, moving cursors, Enter and Escape by default. The touch tag functions can be assigned to the keys.
