

SPINE BEAM - represents  
the spmt spine  
Width: 270mm  
Depth: 600mm

Structure is pinned in both  
direction.

Spine beam's offset =  $0.5 \times \text{depth of transport beam} + 0.5 \times \text{depth of spine beam}$ .

Structure is moment connected in  
transverse direction and braced in  
longitudinal direction.

UC 200 x 59.5

UC 310 x 96.8

Dummy elements  
Pipe members  
Diameter 219mm  
thickness = 13mm

Modelled to capture  
the correct center of  
gravity in vertical  
position

Joint coordinates:  
0 0 0

**CENTER OF GRAVITY**

X	2500	mm
Y	2693	mm
Z	975	mm
