

Proposed Location of the Power plant & LTS System

The generated condensate amount from the LTS system is estimated to be 10 Tons/day with the following chemical composition.

Condensate Composition	
Components	Mass %
Methane	2.35
Ethane	4.71
Propane	23.60
Butanes	32.30
C5+	35.3
Nitrogen	0.006
Carbon dioxide	0.23
Water	1.49
