In the list above, under "Programs" right-click on CMD that appears above and choose "Run as Administrator" and click "Continue".
If the following window appears, select Yes.

## 4. Type regsvr32 sldthumbnailprovider.dll

5. If this line alone doesn't work, you have to go to the folder then run it....If it does work, ignore following steps.

## Type cd\.

Then type cd\program files\solidworks corp\solidworks (2)

It will notify you that it was successful. (Since I already did it, the window does not popup again.) Type Exit.

My thumbnails came back. ;-)
