

## **HOW TO OBTAIN FREE UNITED STATES PUBLISHED ENGINEERING DOCUMENTS**

Do you remember your days at the University where you could get all your text books for free? I sure do. My parents gave me a credit card with no limit and I used it to pay for all my books and computers because only schmucks and poor people work. My girlfriend, Heidi Klum, thought I was quite the stud because I always purchased her liquor and we ate at the finest restaurants in my college town. I deserved it because I'm an Engineer! Oh, and the sex was great.

So through the magic of the Internet I have found a way to download NFPA, ASME, ANSI, ISA, API and ASHRAE standards for no cost. Again, NO COSTS!

To download your documents which are valuable, intellectual property produced by highly respected engineers, scientists and technicians who are passionate for the spreading the word of their work because their clients shower them with money, food and beautiful, sexually aggressive persons of the opposite text, just go to the following website and log in using the included username and password which are case sensitive:

[WWW.FREEUSEENGINEERINGSTANDARDS.TV](http://WWW.FREEUSEENGINEERINGSTANDARDS.TV)

**USERNAME: DUMBASS**

**PASSWORD:**

**THESTUPIDENTPERSONONTHEINTERNET**

You're welcome. Enjoy your free standards. I know my server is slow but keep trying because it costs money to upgrade my AOL server.
