

# **SPECIFICATIONS FOR HIGHWAY BRIDGES**

## **PART V SEISMIC DESIGN**

**MARCH 2002**

**JAPAN ROAD ASSOCIATION**

## CONTENTS

### Part V : Seismic Design

Chapter 1	General.....	1
1.1	Scope .....	1
1.2	Definition of Terms.....	1
Chapter 2	Basic Principles for Seismic Design.....	4
2.1	Fundamentals of Seismic Design.....	4
2.2	Principles of Seismic Design.....	6
2.3	Classification of Importance of Bridges .....	10
Chapter 3	Loads to be considered in Seismic Design .....	11
3.1	Loads to be considered in Seismic Design and their Combinations .....	11
3.2	Effects of Earthquake.....	12
Chapter 4	Design Earthquake Ground Motions .....	13
4.1	General.....	13
4.2	Level 1 Earthquake Ground Motion .....	14
4.3	Level 2 Earthquake Ground Motion .....	17
4.4	Modification Factor for Zones.....	21
4.5	Ground Type for Seismic Design.....	27
4.6	Ground Surface to be considered in Seismic Design.....	29
Chapter 5	Verification of Seismic Performance .....	32
5.1	General.....	32
5.2	Limit States of Bridges for Seismic Performance Level 1.....	34
5.3	Limit States of Bridges for Seismic Performance Level 2.....	34
5.4	Limit States of Bridges for Seismic Performance Level 3.....	40
5.5	Basic Principles to Verify Seismic Performance.....	42
5.6	Unseating Prevention Measures of Bridge Superstructure .....	46
Chapter 6	Verification Methods of Seismic Performance Based on Static Analysis .....	48
6.1	General.....	48
6.2	Calculation Methods of Loads in Static Analysis .....	49
6.2.1	General.....	49
6.2.2	Inertia Force .....	50
6.2.3	Calculation Method of Natural Period .....	57
6.2.4	Seismic Earth Pressure.....	69

6.2.5	Seismic Hydrodynamic Pressure.....	74
6.3	Verification of Seismic Performance Level 1 for Earthquake Ground Motion.....	81
6.3.1	General.....	81
6.3.2	Calculation Method of Inertia Force.....	81
6.3.3	Design Horizontal Seismic Coefficient.....	92
6.3.4	Verification of Seismic Performance Level 1 .....	95
6.4	Seismic Performance Verification for Level 2 Earthquake Ground Motion.....	97
6.4.1	General.....	97
6.4.2	Calculation Method of Inertia Force.....	98
6.4.3	Design Horizontal Seismic Coefficient.....	100
6.4.4	Force Reduction Factor.....	106
6.4.5	Performance Verification for Seismic Performance Levels 2 and 3.....	110
6.4.6	Performance Verification for Reinforced Concrete Columns .....	112
6.4.7	Performance Verification for Pier Foundations.....	116
6.4.8	Performance Verification for Abutment Foundations .....	119
6.4.9	Performance Verification for Superstructures.....	121
6.4.10	Performance Verification for Bearing Supports .....	121
Chapter 7	Verification Methods of Seismic Performance based on Dynamic Analysis .....	122
7.1	General.....	122
7.2	Design Earthquake Ground Motions for Dynamic Analysis.....	124
7.3	Analytical Models and Procedures .....	127
7.3.1	Analytical Models and Procedures.....	127
7.3.2	Modeling of Structural Members .....	130
7.4	Verification of Seismic Performance .....	133
Chapter 8	Effects of Seismically Unstable Ground.....	138
8.1	General.....	138
8.2	Geotechnical Parameters of Extremely Soft Layer and Sandy Layer Prone to Liquefaction .....	139
8.2.1	General.....	139
8.2.2	Assessment of Extremely Soft Soil Layer in Seismic Design.....	140
8.2.3	Assessment of Soil Liquefaction.....	140
8.2.4	Reduction of Geotechnical Parameters .....	145
8.3	Verification of Seismic Performance of Foundations for Liquefaction-induced Ground Flow .....	148
8.3.1	General.....	148

8.3.2	Calculation of Lateral Force on Foundations by Liquefaction-induced Ground Flow .....	152
Chapter 9	Verification of Seismic Performance of Seismically Isolated (Menshin) Bridges.....	156
9.1	General.....	156
9.2	Verification of Seismic Performance of Seismically-Isolated Bridges.....	162
9.3	Analytical Model of Isolation Bearings.....	165
9.3.1	General.....	165
9.3.2	Inelastic Hysteretic Model of Isolation Bearings.....	165
9.3.3	Equivalent Linear Model of Isolation Bearings.....	166
9.4	Basic Performance Requirement for Isolation Bearings.....	171
9.5	Other Structures for reducing Effects of Earthquake.....	173
Chapter 10	Lateral Strength and Ductility Capacity of Reinforced Concrete Columns.....	174
10.1	General.....	174
10.2	Evaluation of Failure Mode, Lateral Strength and Ductility Capacity .....	175
10.3	Calculation of Lateral Strength and Displacement .....	181
10.4	Stress-Strain Curve of Concrete .....	188
10.5	Shear Strength.....	193
10.6	Structural Details for Improving Ductility Performance .....	199
10.7	Cut-off of Longitudinal Reinforcement at Mid-Height .....	209
10.8	Lateral Strength and Ductility Capacity of Reinforced Concrete Two Column Bents .....	212
10.9	Effect of Eccentric Loading of Superstructure .....	226
Chapter 11	Verification of Seismic Performance of Steel Columns .....	231
11.1	General.....	231
11.2	Verification of Seismic Performance by Dynamic Analysis.....	232
11.3	Structural Details .....	241
11.4	Design for Anchorage Block.....	247
Chapter 12	Verification of Seismic Performance of Pier Foundations.....	249
12.1	General.....	249
12.2	Calculation of Sectional Force, Ground Reaction Force, and Displacement of Pier Foundations .....	252
12.3	Yielding of Pier Foundations.....	256
12.4	Calculation of Foundation Response in Case of Plastic Hinges Generating in Pier Foundations .....	257
12.5	Ductility and Displacement Capacity of Pier Foundations.....	260
12.6	Design of Members of Pier Foundations .....	261

Chapter 13	Verification of Sesmic Performance of Abutment Foundations at Site Prone to Soil Liquefaction .....	263
13.1	General.....	263
13.2	Horizontal Seismic Coefficient for Performance Verification of Abutment Foundations .....	266
13.3	Calculation of Response Ductility Factor of Abutment Foundations .....	268
13.4	Ductility Capacity of Abutment Foundations .....	270
13.5	Design of Members of Abutment Foundations .....	270
Chapter 14	Verification of Sesmic Performance of Superstructure.....	271
14.1	General.....	271
14.2	Steel Superstructure .....	273
14.2.1	Strength and Displacement Capacity .....	273
14.2.2	Structural Details.....	273
14.3	Reinforced Concrete Superstructure.....	275
14.3.1	Strength and Displacement Capacity .....	275
14.3.2	Structural Details.....	277
14.4	Ends of Superstructure.....	279
14.4.1	Gap between Two Adjacent Girders.....	279
14.4.2	Expansion Joints .....	284
14.4.3	Joint Protectors.....	286
Chapter 15	Verification of Sesmic Performance of Bearing Support System .....	290
15.1	General.....	290
15.2	Design Seismic Force for Performance Verification of Bearing Support System .....	293
15.3	Performance Verification of Bearing Support System.....	299
15.4	Structural Details of Bearing Support System .....	302
15.5	Excessive Displacement Stopper .....	304
Chapter 16	Unseating Prevention System .....	308
16.1	General.....	308
16.2	Seat Length.....	314
16.3	Unseating Prevention Structure .....	324
16.4	Structure for Protecting Superstructure from Subsidence.....	328
16.5	Excessive Displacement Stopper .....	329
