

Sample question #3:

For the drawing given above, the minimum permissible distance between the outside of the part and the edge of a hole is:

- a. 16.6
- b. 16.65
- c. 16.8
- d. 16.95

Resultant condition of ~~the~~ hole in pattern = $\varnothing 13.2$

LMB of O.D. = $\varnothing 151.5$

$$\frac{151.5 - 105 - 13.2}{2} = 16.65$$
