

Code lines:

Javascript to populate the textarea with upcoming client birthdays:

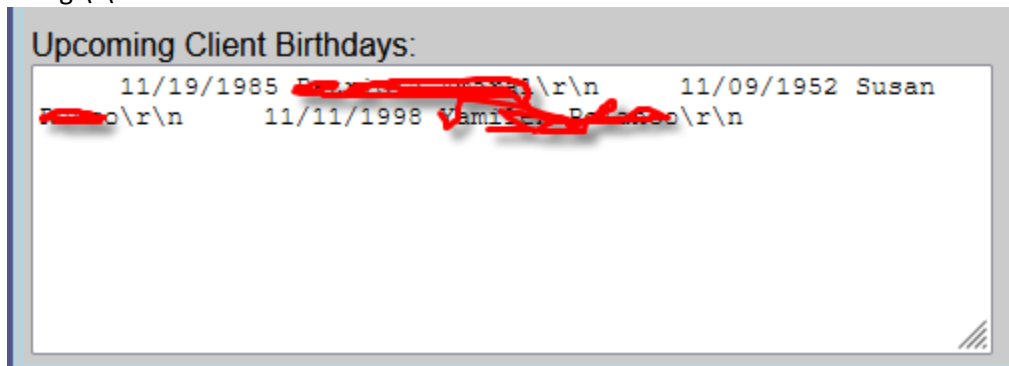

```
var newLine      = "\\r\\n"; // "\\n";  "<br/>";  "\\r\\n";  " 
";
.
.
.

var strAllBirthdays = "";
if ( numTotBirthdays > 0 )
{
    for ( x = 0; x < numTotBirthdays; x++ )
    {
        strAllBirthdays += "      " + strClientBirthdaysDATE [x] + " " +
strClientBirthdaysCLIENT [x] + newLine;
    }
    eDiv.value = strAllBirthdays;
    //eDiv.innerHTML = strAllBirthdays;
```

HTML section:

```
<table width="100%">
  <tr>
    <td>Upcoming Client Birthdays:<BR>
      <textarea id="eDiv" name="eDiv" rows="8" cols="57"></textarea>
    </td>
  </tr>
</table>
```

Using \r\n:

Using <br>:

**Upcoming Client Birthdays:**

11/19/1985 ~~Patricia L. [redacted]~~<BR> 11/09/1952 Susan  
~~[redacted]~~<BR> 11/11/1998 ~~[redacted]~~<BR>
