On 1/31/2024 at approximately 1653hrs, I was on patrol while working at the Boise Airport and was driving a marked patrol car on Rickenbacker St in front of the Jackson's Jet Center headed eastbound. While there, I heard a loud crash behind me and looked in my side mirror and saw the new metal hangar that was being build collapsing. It appeared to be collapsing from the center of the structure. I turned my car around and quickly responded to the area to see if everyone on the job site was okay.

As I exited my patrol vehicle, I saw no one. My thought was that maybe the workers had gone for the day and the structure had just collapsed with no one working there. As I began to walk toward the east side of the building, I ran into a frantic man wearing an orange shirt and hard hat who stated that there were several workers inside of the collapsed building who were either seriously injured or deceased. I did not get this man's name or see him again as my focus was now trying to find any survivors. I immediately notified dispatch and called for medics and more responders. At this point, I had no idea how many people were involved. I then responded to the south side of the structure where Boise Fire ARFF responders were pulling up on scene and gave them as much information as possible in reference to persons involved. The collapsed structure was very unstable and I was not able to go very far at that time into the downed building. I did observed one male who was alive and needed help. I directed fire personnel over to him and they were able to carry him to safety. At this point, many other officers and supervisors began to arrive and the scene was taken over by Lt. Weir. I assisted with looking for more victims until we were ordered to get out from inside of the building as it was still very unstable. While inside, I located three deceased male adults, with one of them being decapitated. There names at this point are unknown. Many people were transported to St. Als ER and at the time of this writing, their names are also unknown. I did not interview any witnesses or victims during this event.

I then exited the building and assisted several officers in placing crime scene tape around the area. For names of those involved and witnesses, please see supplements of the other officers involved.

Narrative

On January 31, 2024 I was working my current assignment on patrol in full uniform and in a marked patrol unit. At approximately 1700 hours I responded code 3 to a report of a structure collapse off Wright St. near the airport. Once on scene I went directly to the structure and assisted officers on scene in searching for subjects that may still be trapped inside the structure.

I spoke with a subject that had been driving on the freeway east bound when the structure collapsed. Matt Parker advised he was in his way home and observed the structure falling. Matt told me he drives by this building everyday and yesterday 1/30/24 there were 3 cranes inside the structure that appeared to be holding it up. He said today there was just the one crane. I had Matt fill out a witness statement form with all of his information and as detailed of an account he could provide.

I was directed by Sgt. Andreoli to relocate to the Reunification Staging area and standby for family members.

later I was then tasked with traffic control at the intersection of Wright and Vista.

I was relieved of traffic control by Sgt. McCarthy at approximately 2000 hours.

Please route this with the original report.

Narrative

1/31/2024

On this date I responded to St Lukes Hospital down town Boise, room A7 to contact one of the victims, later identified by hospital paperwork and verbally as Henry Chen. Chen was identified as one of the victims from the listed construction site.

Utilizing a translator provided by the hospital through the language line, I asked Chen if he would be willing to sign a medical release form. I explained the purpose of the medical release form through the translator. Chen stated he would be willing to sign the form. I provided Chen with the form to sign and he did so. See attached.

Before leaving I asked Chen if he had any questions for me. Chen asked about his other co-workers. I advised him I was not aware of their conditions. Chen stated he knew at least 2 of his friend has died at the scene, Maireno Och and Mario Ontay. He said he was not sure about Brian Garcia though. Chen asked if I wanted him to contact their families because he did not believe we would be able to because they lived in Mexico. I explained to Chen Detectives and the Coroner were working on identifying everyone at the scene and contacting families. I told him I would relay his information to detectives in case they needed his help notifying families. I provided Chen's info and his request to detectives.

INITIAL RESPONSE/CONTACT: On the date of 1/31/24 around 1700hrs, I responded to the address of 4125 Wright Street (Firehawk) reference a structure collapse that was reported by Officer Rosier. Upon arrival I witnessed the new metal structure just East of Firehawk collapsed. During this time fire personnel along with multiple police units were beginning to arrive on scene. I began directing fire units along with medical units to the staging area just East of Firehawk.

I did not make my way into the collapsed structure, nor did I interview any witnesses. I stayed on scene and assisted with putting up crime scene tape on the West side of the collapsed structure. I had no further involvement.

INITIAL RESPONSE/CONTACT:

On 1/31/24, I responded to a lot on W Wright St, near the Jackson Jet Center, 3815 Rickenbacker St. I arrived on scene at approximately 1720 hours and met with Sergeant Jordan McCarthy; I was asked to take overview photos of the scene of a collapsed structure.

Upon my arrival on scene I observed a very large metal structure that appeared to have collapsed in on itself; many of the metal beams were leaning, bending, broken, and/or looked warped. Within the collapsed structure, I observed multiple construction machines, possibly cranes/lifting devices, that had been trapped by the metal beams. Most of the machines were damaged. On the south side of the scene, I observed a ford truck, ID plates 1A BB92T, had been smashed by what appeared to be the arm of a crane.

Additionally, I observed emergency personnel tending to those who were injured at the site. I observed multiple people were transported away from the scene in ambulances. A victim could be seen on the platform of one of the machines on the east side of the scene. Rescue efforts were being attempted by emergency personnel.

I took overview photographs of the above mentioned items. I began my photo series on the northeast corner of the lot and made my way counter clockwise around the site. Due to scene safety concerns, I did not move up to the structure for closer up photos.

This concluded my CSI duties.

Narrative

INITIAL RESPONSE/CONTACT:

On 1/31/24 at approximately 1653 hours, Officer Rosier notified dispatch that the construction site at Jackson's Jet Center had collapsed. Rosier called for EMS and fire to respond. Rosier also stated that several people may be trapped inside the debris.

Officer E. Johnson and I responded from the airport to the location of the incident. Based on the amount of damage, I requested that incoming units shut down East and westbound traffic at Wright / Orchard and Wright / Vista. Officer Johnson stayed near the construction entrance and made sure that incoming units were not blocking egress and ingress to the construction site. I was escorted by a construction worker to the back side of the construction site near the airport. I observed four fireman carrying out one Hispanic male and set him on the ground next to me. The firemen went back into the structure. I tried to communicate with him and another Hispanic male who was ambulatory, but holding his chest. I also supplied some firemen with latex gloves from my first aid kit.

I was able to communicate somewhat with the male standing and learned that nine of his coworkers were trapped in the area he was working. He stated that he was not hurt and the only other male to get out was laying down. I requested a Spanish speaker come to my location and try to gather additional information. Officer Arroyo arrived a short time later and was able to speak with the Hispanic males and advise the fireman of their injuries and others that were trapped. Arroyo wrote down the men's names and identifying information. In addition, Arroyo spoke with the injured male's brother who was also a construction worker who hadn't been injured.

After the injured male was transported by EMS to St. Alphonsus I was asked to return to the TSA checkpoint at the airport.

Information only, route to file.

Narrative

INITIAL RESPONSE/CONTACT:

On 1/31/24 at approximately 1653hrs I was driving on the secure side of the airport property as part of my normal duties. I heard Ofc. Rosier state over the radio that he had just observed a major structural collapse and he believed that there were multiple people still inside. I activated my emergency lights and soon arrived on the south side of the fenced in construction area, just west of Jackson Jet Center. I observed that the steel frame building appeared to have collapsed inward upon itself.

An airport Ops employee arrived on scene with bolt cutters and I held the fence as he cut a portion away so that we could enter the area. Once a section was opened I entered the construction site, along with several firefighters. I observed an unknown male with a laceration to his face and another unknown male who appeared uninjured. The firefighters began speaking with the injured male and I asked the other if he was hurt. He shook his head no, so I continued checking the south and east side of the building for any victims. A short time later fire advised that the structure was not stable and Lt. Weir advised all PD to exit. I remained on the south perimeter until I was cleared from the scene by Lt. Hunsaker.

Narrative

INITIAL RESPONSE/CONTACT:

On the above date and time, I was working my assigned shift with my trainee, Officer Kadriu. Officer Kadriu and I responded to the listed location after an officer advised there was a construction accident.

We arrived on scene at Wright St. and Rickenbacker St. I observed that the metal structure had collapsed. We assisted with rescue efforts as there were multiple casualties still inside the structure.

Later, I responded to the witness collection point and interviewed, Miguel Castaneda Pina. Miguel worked for Big D Builders and stated that he recently moved to Boise. Miguel stated that today prior to the incident he was on the perimeter of the structure sweeping when he observed it collapse. Miguel stated that he believed the incident was caused by an accident but did not see anyone intentionally attempt to cause the structure to fail.

This was the extent of my involvement in this call.

Narrative

On the above date and time, I was working my assigned shift as a uniformed officer in the city of Boise with my FTO Officer Castillo when I was dispatched to a structure collapse at 3975 W Airport Way. Dispatch advised that a huge hangar collapsed and that multiple people were possibly trapped.

I arrived on the east side of the hangar and attempted to aid in the recovery efforts. I assisted Officers Kennedy and Poole move an injured patient to the casualty collection zone. I assisted fire crew to move one more patient and walked through the site to identify more casualties. I noticed a clearly deceased male near the center of site. I noticed two more males that appeared deceased and checked the pulse on one male with negative results. Then I maintained a perimeter position on the east side of the hangar until I was relieved. Later, I interviewed three witnesses that were onsite when the hangar collapsed.

Pierce Ricky is a crane operator for Inland Crane. Ricky stated that he was using the portable restroom on site when he heard a loud metal noise. Ricky stated he looked out of the mesh to make sure nothing was falling on him then ran out to see what happened. Ricky then went out to help anyone he could on site. Ricky stated that Inland Crane was there to help straighten out the hangar because portions of it were bending.

Joshua Ratto works as a mechanic for Inland Crane. Joshua stated that he was in his truck when the hangar began to collapse. Joshua put his truck into reverse and avoided being struck by falling debris. Joshua stated that he saw nothing suspicious and believed the collapse was due to an engineering problem. Joshua stated he did not notice a specific action cause the hangar to collapse.

Colin Moeser works for Airport Operations. Colin stated that around 1630 hours he set off on his usual route on the tarmac. Colin stated he saw the hangar collapse from his truck and called it over his radio per procedure. Colin did not notice any suspicious activity related to the collapse.

Route with original report.

Narrative

Initial information:

On January 31, 2024 at approximately 1653 hours, I responded to the area of W Wright St and W Rickenbacker St regarding a structure that collapsed near the airport. Upon arrival, Officer Barber and I entered the scene and began evacuating workers from the area. Once the scene was secure, I responded to help with Spanish translation.

Translation interview:

I translated for Detective Kendall and spoke with Pedro. I asked Pedro if he believed the incident occurred on purpose or if someone caused the incident on purpose. Pedro stated he did not believe the incident occurred on purpose because most of his coworkers were his friends and family. Pedro stated none of his coworkers appeared to be acting differently, angry or upset. Pedro stated no one crashed into or damaged the cranes on purpose.

Castaneda interview:

I interviewed witness, Cristian Castaneda, regarding the incident that occurred near the airport. I asked Castaneda if he believed the incident occurred on purpose or if someone caused the incident on purpose. Castaneda stated he did not believe the incident occurred on purpose but that it was an accident. Castaneda stated none of his coworkers appeared to be acting differently, angry or upset. Castaneda stated no one crashed into or damaged the cranes on purpose.

Castaneda-Pina Interview:

I interviewed witness, David Castaneda-Pina, regarding the incident that occurred near the airport. I asked Castaneda-Pina if he believed the incident occurred on purpose or if someone caused the incident on purpose.

Castaneda-Pina stated he did not believe the incident occurred on purpose but that it was an accident. Castaneda-Pina stated none of his coworkers appeared to be acting differently, angry or upset. Castaneda-Pina stated no one crashed into or damaged the cranes on purpose.

Estuardo Interview:

I interviewed Tommy Estuardo and asked him what had occurred. Estuardo stated he was working on the crane with his coworker when he heard a loud noise. Estuardo said he looked back and saw the structure start to fall. I asked Estuardo if he believed the incident occurred on purpose or if someone caused the incident on purpose. Estuardo stated he did not believe the incident occurred on purpose but that they were told to work fast today because it was expensive to rent the equipment. Estuardo stated they had been working quickly throughout the day but did not think one person was responsible for what occurred. Estuardo stated none of his coworkers appeared to be acting differently, angry or upset. Estuardo stated no one crashed into or damaged the cranes on purpose.

I captured this contact on my Axon on-body video.

Narrative

On 01/31/2024 at approximately 1700, I responded to a reported building collapse near the 4000 block of Wright St in Boise. The incident was dispatched as a fire assist with multiple injured and confirmed casualties.

Once on-scene, I assisted with rescue efforts along side additional officers and Boise Fire Dept members to locate any and all subjects that were effected by the structure. The Structure appeared to be a metal hangar that was being built, the structure had collapsed and I observed multiple subjects being placed on stretchers or boards to be taken out from inside of the structure. As I walked through the structure from west to east, I observed subjects that were obviously deceased inside of the structure. Additional subjects were receiving immediate medical attention by Boise Fire Dept and Ada County Paramedics.

After assisting on the site, I relocated with my trainee, Ofc Scanlan to St Alphonsus-Boise to see to the injured subjects brought there. Ofc Scanlan interviewed two subjects at the hospital, see his report for further. After his interview's, I had no further action on this incident.

Narrative

On 01/31/2024, at about 1710 hours, I responded to assist officers with a building that had collapsed with subjects inside. Upon arrival I assisted on scene as needed. I learned there were victims who had been transported via ambulance to St. Alphonsus medical center with injuries. I responded to St. Alphonsus medical center. I contacted Manico Lopez who was in the emergency room # 11. He told me his left leg, back, and head hurt and had visible injuries to his head. Monico said he was on a lift in the middle of the building. He told me the building began to sway and that's all he knew. The medical professionals at the hospital were unable to give me any diagnosis while I was there. Monico's wife, Rosa Lopez, was there with him in the emergency room. She signed a medical release form for her husband who was unable to move.

I then contacted Pedro Lopez in emergency room # 12. Pedro was injured and unable to give me a statement as to what happened or able to move. Medical staff told me he had a [REDACTED] [REDACTED]. Pedro's mother, Maria Roa, was in the emergency room with him. She signed a medical release form for Pedro.

Both medical release forms were attached to this report.

Narrative

INITIAL RESPONSE/CONTACT: On 1/31/24 I was advised by Sgt Kendall of this incident and was assigned to respond to the command post to assist in the investigation. I drove to the scene and located the command post which was on the south side secure area of the airport footprint. I was given a brief of what command knew at that time and I observed the scene from out side. I was assigned to respond to the Jackson jet center to interview witnesses.

INVOLVED PERSONS/RELATIONSHIP(S): Witness: David Stark, Jasen Skyberg, Terry Lehto, Edgar Garcia.

WITNESS INTERVIEW:

David Stark

Stark was the Superintendent general contractor employed by Big D construction. I asked Stark what happened. He said they were finishing up the last "girder" today. He was on the ground in the middle of the structure and heard several loud "pops" and a "creek" sound. In his line of work that sound tells you to run out, which he did. He ran south towards the runway, and then ran around the perimeter to check on the site and workers. He called out for help and went inside seeing one guy not moving. He rolled him over and thought he was dead. He later saw him on his knees. He waited outside and felt he was going into shock.

I asked how many employees he had on site at this time. He believed he had 15 from Big D construction and Inland Crane had 4-5 employees. I asked Stark about any problems with the construction or anyone who was mad that would have done something intentional. Stark said there were no problems and nothing he saw that was out of the ordinary. It was a standard building but was his first steel building. He saw no negligence or anyone messing around.

He said Dennis was one of the owners of the company whose brother was deceased inside the building.

Jasen Skyberg

He works for Big D construction and was on site when this happened. Skyberg was on the inside middle of the structure when he heard what he thought were the sounds of cables popping, "pop, pop, pop." He ran to the north west out of the structure. He saw one guy who was bloody and guys in a lift. First responders arrived and started helping. Skyberg said all the Inland Crane employees were on the outside of the structure.

Terry Lehto

Lehto is a crane operator employed by Inland Carne. He was the only one operating a crane at that time

since the others had been released. He was holding one piece at 5,000lbs while they put the "perlings" in. He heard a loud "pop" or "bang" sound and the structure went down. He stayed in the crane and then jumped out to help. He saw several guys laying on the ground, some dead and some hurt. He told them not to move and then called 911. I asked Lehto about anything strange or different on this project. He said he is not a steel worker so he did not see anything out of the ordinary.

Edgar Garcia

Garcia works for Inland Crane and was the supervisor at this project. He was not present when the structure collapsed. He had just left and received a call from Jessie Cooper that the building collapsed. He drove back to the scene. I asked Garcia if there was anything out of the ordinary on this site. He said he noticed a "bow" in a beam and told Craig several times that it did not look right. Garcia said he does not tell other people how to do their job and is not an iron worker. He has worked a crane on several of these types of sites and the "bowing" of the beam did not look right to him. Craig called an engineer twice and Craig told Garcia it was fine after speaking to the engineer as they put some straps and a come along on the beam. Garcia said that did not look right to him and has never seen that before. Craig was trying to put more "perlings" on.

Garcia said wires were popping yesterday which he felt was not normal as it was the first time he has seen beams sag or wires pop. Garcia made sure his guys were okay and stayed on scene.

I briefed Sgt Kendall on my interviews and was advised to respond back to the command post to meet with OSHA investigators. We advised Joel Barlow with OSHA of our interviews.

I was released from the scene and left.

On 2/1/24 I viewed a few of the officers cameras as well as airport video.

CONCLUSION: At this time, I have not seen evidence of criminal activity in this investigation. Route with original report.

Narrative	
------------------	--

INITIAL RESPONSE/CONTACT:

I was asked to assist with the death notification of two individuals who were involved in the industrial accident. I met with the Coroner at their building located at 5550 W Morris Hill Rd.

Upon my arrival I was given a phone number and informed that it was the phone number of the mother of one of the deceased persons. I was also informed that the family was currently living in Guatemala and did not speak English. I called the number provided and made contact with a member of the family in Guatemala.

I was informed that this was the phone number for Dorthia, but I would not be able to speak to her due to her primary language being K'iche. K'iche is a secondary Mayan language spoken in Guatemala which I cannot speak. The person I was speaking to was the daughter-in law to Dorthia and informed me that she would pass any information along provided. I informed her of the information we currently have, that Mariano and Mario died when the building collapsed that they were working in.

I informed her that the Coroners Office would be calling later that day with more information, along with another Spanish speaker. She thanked me for my time and informed me that she would inform the family on the news. The call was soon ended.

Narrative**INITIAL RESPONSE/CONTACT:**

I am currently in the Field Training Officer Program; Officer Echols is my Field Training Officer.

On 01/31/2024, at approximately 1705 hours, I was dispatched to an assist fire code three for a report of a structure collapse that occurred at the 3975 Airport Way.

INVESTIGATION:

Upon my arrival, I took a blanket and medical kits out of the back of my patrol vehicle to bring to the scene. Other officers were already on scene as well as Fire and EMS. I worked with other responding officers to form a perimeter around the collapsed structure and look for potential victims. While approaching the north side of the structure, Officer Echols observed a deceased victim within the structure. Paramedics were aware of the individual and were awaiting the remainder of the structure to be cleared. Dispatch advised that three victims had been transported to St. Alphonsus and one to St. Luke's Hospital.

Once multiple victims had been transported to St. Alphonsus Hospital, I drove to St. Alphonsus to assist in collecting statements from victims. Upon my arrival, I was advised from hospital staff that they had at least six victims from the structure collapse with more incoming. Officer Echols advised other responding officers of the number of victims that were being treated. Hospital staff advised me that most of the victims were Spanish speakers.

Hospital staff directed me to exam room 14 where Diego Rodolfo Tum Quinilla [REDACTED] was being treated. I spoke to Diego with the help of a translator from the hospital. I asked Diego what happened at the structure. Diego stated that while he was working from a fork lift installing screws the structure collapsed. Diego was harnessed in and did not fall from the fork lift. I asked Diego if he was with anyone when the structure collapsed. Diego was with Monico Lopez on the fork lift. Diego stated that Monico was not harnessed in and fell from the fork lift. Diego was able to take four pictures from where he was after the structure collapsed. Officer Echols took photographs of the pictures on Diego's phone. Hospital staff began taking x-rays of Diego's upper and lower body. Diego had [REDACTED].

After speaking with Diego, I spoke with officers on scene at the hospital who were gathering a list of victims being treated at St. Alphonsus. Officer's had not yet spoken to Alejandro Lopez [REDACTED]. [REDACTED], in exam room 13. I spoke with Jacqueline Lopez, Alejandro's niece, who agreed to translate for me. I asked Alejandro what he could recall happening from the incident. Alejandro stated that he was

Narrative**Origin:**

On 1/31/2024 at approximately 1700 hours I self-assigned to the call of a structure collapse at 3201 W Airport Way Boise, ID in Ada County.

Investigation:

I arrived on scene at approximately 1710 hours and approached the structure from the west side. I assisted firefighters on scene carry a victim on a gurney from the center of the collapsed structure to the west side of the structure where medics and ambulances were staged. The victim was conscious and breathing. He appeared to have lacerations to his head and was bleeding profusely.

I searched the southern half of the structure in attempts to locate any injured people on scene. I observed two middle aged men lying in the center of the structure who appeared to be deceased. There were additionally two construction equipment lifts in the middle of the structure. One lift had two adult males in a basket that was roughly 20 feet in the air. Both males appeared to be unconscious. The other lift had one adult male in a basket roughly 30 feet in the air. He also appeared unconscious. There were no other injured people that I located inside the southern part of the structure.

I helped secure the perimeter on the north side of the property while firefighters continued to search for injured people. I then went to the intersection of Orchard and Wright to prevent traffic from entering the scene. I escorted one male to the Jackson Jet Center who stated he was the owner of one of the companies that was involved in the structure collapse. I also escorted one male who worked for OSHA to the south side of the scene located on the airport tarmac.

Conclusion:

Route with main report.

"I certify (or declare) under penalty of perjury pursuant to the law of the State of Idaho that the foregoing be true and correct"

Narrative

On January 31st, 2024 at about 5:00 PM I was working as a Detective for the Boise Police Department, assigned to the FBI Joint Terrorism Task Force. I heard several law enforcement vehicles drive by my office. I activated my department radio and heard multiple officers were needed for a situation near Wright St./Rickenbacker St. I went en-route to the location. While en-route, I learned that a structure had collapsed, and rescue operations were underway. I was advised a command post was set-up to the south of the structure. I responded to Wright St./Rickenbacker St. and met up with Sgt. Zubizarretta. I asked what needed to be done, and he advised that we needed to keep individuals away from the structure, and then Lt. Weir

Supplemental Report

RD: 8025 DR# 2024-401655

1. Incident Topic MISCELLANEOUS REPORT		2. Subject/Victim's Name	
3. Address 4000 BLK OF WRIGHT ST , BOISE		4. Phone	
5. Date Occurred 01/31/2024	6. Time Occured 16:53	7. Route To File	8. Division NCO

ordered all Boise Police Personal out of the collapsed structure. Patrol officers began to set up a crime scene tape. I checked with Lt. M. Jones who was also on scene. I advised him that I would attempt to locate any witnesses for the collapse, as I saw a large group of individuals near Jackson's Jet Center looking at the structure.

I spoke with members from Jackson's Jet Center as they stood on their property near the front door. I asked, Marshall West, if their facility had any exterior cameras that surveilled, they structure. He said they did not. I asked if any employee saw what occurred. Lynette Robich said she was at her desk and saw the structure fall. She said her desk in on the far west side of Jackson's Jet Center, and that she has a window, behind her computer screen. Lynette said she was working on her computer when she heard a loud Roar, almost like an aircraft, but different. She looked up and saw a law flat metal sheet, on the further south portion of the structure, detach from the southernmost support beam and fall to the ground. She said as that occurred, the support beams and rest of the structure fell to the ground. She said the entire collapse occurred in 3-5 seconds.

I asked Lynnette Robich, Marshall West, Matthew Irvin, and Danielle Soto, all employees of Jackson Jet center if they saw anything suspicious prior to the collapse, earlier in the day or within the last several days. All stated that nothing suspicious, or unusual had occurred. Marshall stated that he called, Firehawk Aviation, the business directly to the west of the construction site and spoke to their manager to determine if they had any video surveillance that captured the collapsed structure. He said they did not. Marshall did tell me at least one Firehawk employee, Nichole, witnessed the collapse.

I then checked in at the command post and spoke with Lt. Jones and Sgt. Kendall. I advised Sgt. Kendall that I had interviewed subjects from Jackson's Jet Center and was going to Firehawk Aviation to conduct more interview. On my way to Firehawk I was stopped by Deputy Chief T. Brooks. I briefed the Deputy Chief regarding my interview of Lynnette. I then proceeded to Firehawk Aviation. I spoke with two employees that were waiting to be contacted by law enforcement because they witnessed the collapse, and one went into the structure to help. I separated the two individuals and interviewed them independently.

I first met with Nichole Furey. Nichole said she was just finishing her shift and was standing in the building near the glass wall and glass door facing east, towards the collapsed structure. Nichole said she was standing with her colleague Chadwick, having a conversation before leaving work. She showed me the glass wall and door, it is the Northeast most door, corner of Firehawk Aviation. She said she was facing away from the door when she heard a crash and immediately turned around and saw the structure fall inward, toward the center. She said it happened very fast, and she saw a slender male, construction worker run to safety. She said she witnessed a male fall from a crane, hit the ground and stand up quickly. Nichole said the male then collapsed after standing, but another construction employee helped him stand and get out of the structure. She does not know what happened to him after they left the structure. I asked Nichole if she noticed anything unusual or suspicious around the structure earlier in the day, or the day prior or at all. Nichole said that she had not seen anything suspicious prior to the collapse but she spends most of her work time inside the office.

I then spoke with Chadwick Crawford. Chadwick said he was having a conversation with Nichole as they were getting ready to leave work for the day. He said he was seated in a chair facing the glass window and door looking towards the structure. He said he saw the structure collapse, with the large metal support beams fall inwards and towards the center or middle of the structure. He said he does not recall hearing anything, but once the structure fell, he ran into the collapse structure in an attempt to help people. I, Detective Robinson, drew a not to scale diagram and asked Chadwick to show me where he saw
