

Side View

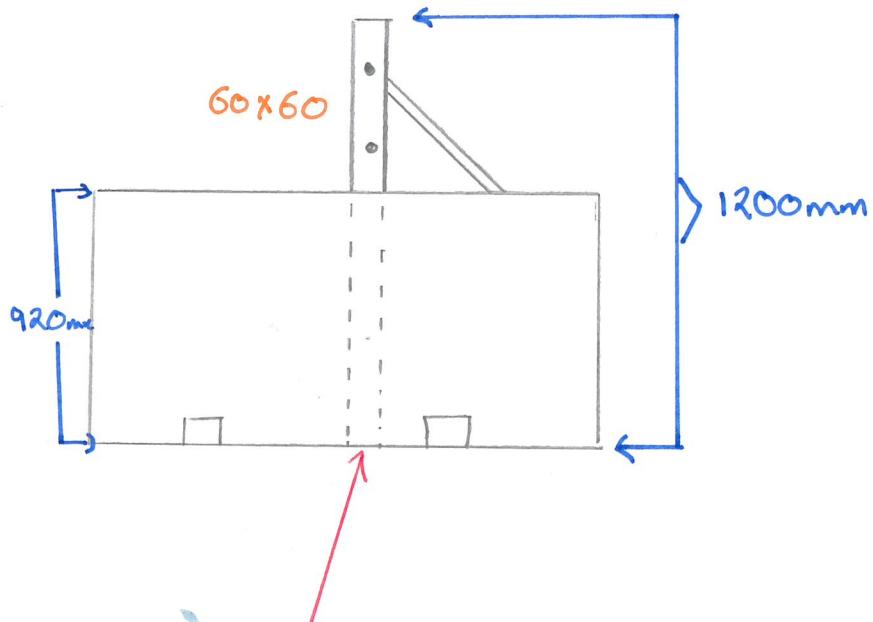

The base will be 3ft high and the 60x60 will be incased in concrete.

The 60x60 will be incased to the floor. This will allow the 50x50 to slide in and to the base giving better support.

2x Bolt holes will allow us to secure the 50x50 when inside the 60x60.

5.4mtrs. (Needs to be 5.4 to allow to run to bottom of base)

60x60 will run straight to floor of base.
