Issue Description:

After installing Java version 1.8.0_351, access to Assistant CM,bSySM is blocked, client preparation blocks at the Java related step and any Java related page cannot be loaded.

The browser or the client PC does not matter in this case.

Involved versions:
Java version 1.8.0_351
Openscape 4000 Assistant V8 R2.22.17

Resolution:

SHA1 denyAfter 2019-01-01 removed from java.security file (it is present 2 times, both of them should be deleted).

This setting is influencing the access to OS4000, even if OS4000 does not use SHA1.
