**Subject: Gasoline tank leakage repair using cold weld technique**

**Dear Sir,**

Reference to the above-mentioned subject, and as the sole agent for UPS (unique polymer system) products it is our pleasure to submit to you the following offer for repairing the leakage in gasoline tank at your site ( on shore ) .

**Technical offer:**

Permanent repairing for the Gasoline Tank leakage by using plate bond cold weld technique .

❖ **Operating Conditions:**

1. Ambient temperature.
2. Content : gasoline

❖ **Scope of work:**

1. Roughen the surface according to UPS products Instruction for Use by using hand tools ( sand paper / copper brush )
2. Clean the surface using MEK “Methyl Ethyl Ketone” (Non-residue chemical cleaner).
3. Apply UPS 105 EG ( Metal Repair Paste is a high performance multi-purpose synthetic metal repair) to the roughened area.
4. Adhise a metal plate with dimension (10\*10 cm) with ups paste on the tank shell to achieve the bond between the metal and the product until reaching the curing time regarding to the data sheet .

## **Financial offer:**

- **The Application Cost 8800 L.E ( Eight Thousands and Eight Hundred Egyptians Pounds )**

## **This Cost includes:**

1. Supplying of unique polymer system products required for the repair.
2. Supplying of MEK needed to perform the technical scope of work.
3. Technical team to perform the application.

## **General terms:**

1. 14 % sales taxes to be added to the above mentioned prices.
2. Payment: 100% upon completion of the applications.
3. This offer is valid for 15 days from date.

**Should you need any further information,  
Please do not hesitate to contact us.**
