

DataGridView after the initial form load. The comboboxes are properly loaded and their Value property is set to be that of the current row:

Delete Bottle	Current Bottle Type...	...New Type (if different)	Ser. Num.
<input type="checkbox"/>	Carbon fiber wrapped	Carbon fiber wrapped ▼	00123
<input type="checkbox"/>	Hoop wrapped aluminum	Hoop wrapped aluminum ▼	11118726
<input type="checkbox"/>	Fiberglass wrapped	Fiberglass wrapped ▼	11221123
<input type="checkbox"/>	Carbon fiber wrapped	Carbon fiber wrapped ▼	12345
<input type="checkbox"/>	Carbon fiber wrapped	Carbon fiber wrapped ▼	223344
<input type="checkbox"/>	Carbon fiber wrapped	Carbon fiber wrapped ▼	6611567
<input type="checkbox"/>	Kevlar wrapped	Kevlar wrapped ▼	7771123
<input type="checkbox"/>	Hoop wrapped aluminum	Hoop wrapped aluminum ▼	8877123

DataGridView after subsequent form loads. Notice that the comboboxes are not set:

Delete Bottle	Current Bottle Type...	...New Type (if different)	Ser. Num.
<input type="checkbox"/>	Carbon fiber wrapped	▼	00123
<input type="checkbox"/>	Hoop wrapped aluminum	▼	11118726
<input type="checkbox"/>	Fiberglass wrapped	▼	11221123
<input type="checkbox"/>	Carbon fiber wrapped	▼	12345
<input type="checkbox"/>	Carbon fiber wrapped	▼	223344
<input type="checkbox"/>	Carbon fiber wrapped	▼	6611567
<input type="checkbox"/>	Kevlar wrapped	▼	7771123
<input type="checkbox"/>	Hoop wrapped aluminum	▼	8877123
